TELEHEALTH INFORMED CONSENT, page 1

Telehealth is healthcare provided by any means other than a face-to-face visit. In telehealth services, medical and mental health information is used for diagnosis, consultation, treatment, therapy, follow-up, and education. Health information is exchanged interactively from one site to another through electronic communications. Telephone consultation, videoconferencing, transmission of still images, e-health technologies, patient portals, and remote patient monitoring are all considered telehealth services.

PLEASE INITIAL BELOW:

_____ I understand that telehealth involves the communication of my medical/mental health information in an electronic or technology-assisted format.

_____ I understand that I may opt out of the telehealth visit at any time. This will not change my ability to receive future care at this office.

_____ I understand that telehealth services can only be provided to patients, including myself, who are residing in the state of Oregon at the time of this service.

_____ I understand that telehealth billing information is collected in the same manner as a regular office visit. My financial responsibility will be determined based on the duration of the visit and/or other care provided, and it is my responsibility to check with my insurance plan to determine coverage.

_____ I understand that all electronic medical communications carry some level of risk. While the likelihood of risks associated with the use of telehealth in a secure environment is reduced, the risks are nonetheless real and important to understand. These risks include but are not limited to:

- It is easier for electronic communication to be forwarded, intercepted, or even changed without my knowledge and despite taking reasonable measures.
- Electronic systems that are accessed by employers, friends, or others are not secure and should be avoided. It is important for me to use a secure network.
- Despite reasonable efforts on the part of my healthcare provider, the transmission of medical information could be disrupted or distorted by technical failures.

_____ I agree that information exchanged during my telehealth visit will be maintained by the doctors, other healthcare providers, and healthcare facilities involved in my care.

_____ I understand that medical information, including medical records, are governed by federal and state laws that apply to telehealth. This includes my right to access my own medical records (and copies of medical records).

_____ I understand that Skype, FaceTime, Zoom, Doxy.me, or a similar service may not provide a secure HIPAA-compliant platform, but I willingly and knowingly wish to proceed if use of Microsoft Teams is not possible and I do not want to reschedule the appointment.
